Solutions

- **Greenfield D365 F&SCM Implementation:** Standardized operations globally by centralizing procurement, production, and financial processes.
- **Automated Quality Testing with Power Automate:** Reduced manual data entry errors by automating quality testing processes and streamlining workflows.
- **Optimized Data Management with Power BI:** Improved Power BI report refresh times by integrating it with D365 F&SCM and simplifying the management of data across entities.
- **Managed Services for Ongoing Support:** Provided ongoing managed services to support client's operations, ensuring seamless system updates, and performance optimization.

Services

- Greenfield Implementation of D365 F&SCM
- Power Automate
- Microsoft Fabric
- Global Rollout
- D365 CE
- Secure365
- Power BI
- Managed services
- Dual Wright
- BI for D365
- Shipping Connector

Benefits

- Cost savings and better control and visibility across entities with unified operations.
- Enhanced accuracy with real-time quality checks across multiple manufacturing facilities.
- Enabled incremental data updates instead of full entity pushes, ensuring faster access to insights for decision-making.
- Effective management of batch jobs, report schedules, and overall system performance.
