# Dynamics 365 CRM

## Implementation Expertise & Configurable Solutions

## DynaTech Systems – Microsoft Solutions Partner

- › 150+ successful Dynamics 365 implementations
- › Proven experience across Manufacturing, Chemicals, Agriculture, Education, Associations, Retail, Sports & Non-profits
- › Comprehensive capabilities: CRM, Marketing, Customer Service, Portals, Integrations, Analytics
- › Expertise in large-scale, multi-region CRM rollouts
- › Focus on configurable CRM—aligned with real business processes, not template-based deployments

### We design CRM systems that

**1** Adapt to your specific business workflows

**2** Support deep customizations  
(entities, plugins, approval flows, automation)

**3** Integrate seamlessly with ERP, portals, WhatsApp,  
CTI, mobile apps

**4** Centralize Sales, Marketing, Service & Operations data

**5** Deliver intelligence through Power BI and  
Microsoft Fabric

**6** Provide extensibility, scalability, and control through  
DevOps-driven delivery

## Lead Capture Automation

- › Collect leads from web forms, emails, WhatsApp, events, and campaigns directly into CRM with automated routing.

1

## Lead Qualification & Scoring

- › Assign scores and qualification rules to prioritize high-intent leads.

2

## Opportunity Lifecycle Management

- › Track deals through configurable stages with clear visibility into progress, blockers, and next steps.

3

## Pipeline & Forecast Visibility

- › Monitor revenue forecasts, deal velocity, and pipeline health in real time.

4

## Account Hierarchy Mapping

- › Visualize multi-level customer structures for accurate reporting and strategic planning.

5

## Field Sales Route Optimization

- › Plan customer visits with Google route optimization and nearby contact suggestions.

6

## Sales Activity Timeline

- › View all interactions—emails, calls, tasks, meetings—in a unified timeline for every customer.

7

## Sales Copilot Assistance

- › Use AI to summarize records, draft emails, and suggest next steps based on activity history.

8

### Custom Estimation Models

Support estimation for projects, services, materials, and multi-line configurations.

### Portal & DocuSign Integration

Enable customers to review, approve, and sign quotes directly through the customer portal with seamless DocuSign workflow integration.

### Configurable Question-Based, Product & Project Configurator

Advanced configurator supporting dynamic questionnaires, rule-based product configurations, and project-specific customization.

### Custom Project Estimate Requests

Allow customers or internal teams to initiate estimate requests for custom projects, capturing detailed scope, requirements, and pricing inputs for accurate quotation.

### Approval Workflow Automation

Set up multi-level approval paths based on discount levels, margins, or deal size.

### Contract & Customer-Specific Pricing

Apply negotiated customer pricing automatically during quote preparation.

### Configurable Quoting Engine

Create quotes with cost, margin, discounts, and pricing rules built specifically for your industry.

### Vendor & Program Pricing

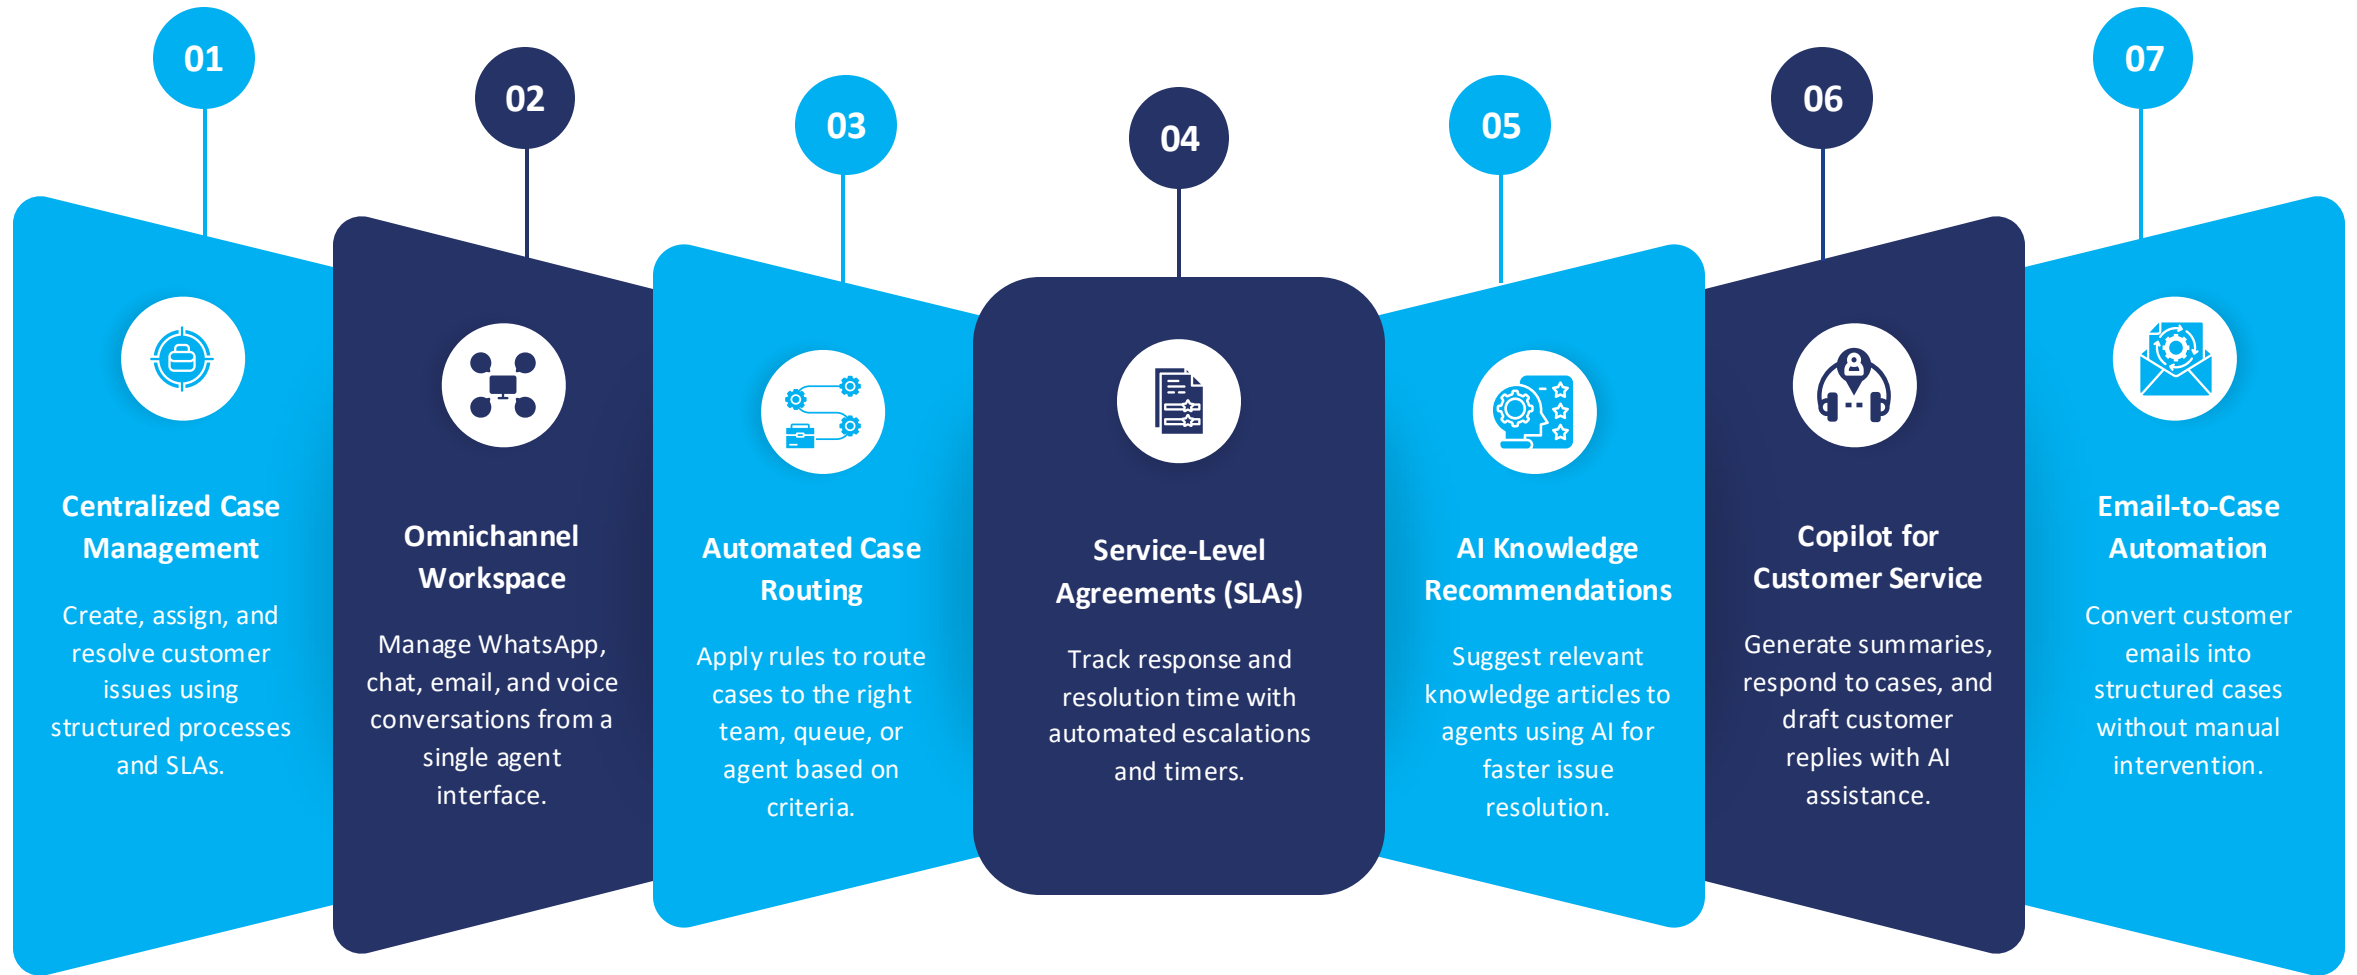

Integrate vendor price lists and promotional incentives into your quoting flow.

### ERP-Integrated Price & Tax Lookup

Pull real-time prices, taxes, and trade agreements from ERP systems.

### Quote-to-Order Conversion

Convert approved quotes directly into sales orders without manual effort.

### Customer Self-Service Portal

- › Let customers view orders, invoices, cases, knowledge articles, and profile details.

### Dealer/Distributor Portal

- › Offer product catalogs, price lists, inventory, loyalty points, and order placements.

### Vendor Collaboration Portal

- › Enable vendors to upload documents, submit prices, track requests, and update information.

### Member & Subscription Portal

- › Manage renewals, certifications, payments, and benefits for association members.

### Case & Request Submission

- › Allow users to log service requests directly from the portal.

### Secure Role-Based Access

- › Show different information based on customer, dealer, vendor, or member roles.

### Portal Chatbot

- › Provide instant Q&A, product help, and guided navigation through an AI bot.

## Order Creation from CRM

- › Generate orders directly in CRM with linked quotes, products, and pricing.

## Order Creation from WhatsApp/Portal

- › Allow customers to place orders through multilingual WhatsApp templates or portals.

## Inventory Availability Check

- › Pull real-time stock levels from ERP before order confirmation.

## Automated Tax Calculation

- › Apply correct VAT/GST/tax rules through ERP or tax engine integration.

## Shipment Tracking

- › Show live shipment status and logistics updates to customers or agents.

## Invoice Retrieval

- › Let customers view or download invoices via CRM or portal.

## Price List & Trade Agreement Sync

- › Ensure CRM pricing always matches ERP pricing data.

## Copilot Across Sales, Service & Marketing

› Microsoft's new Copilot experience provides natural-language assistance inside D365.

### Copilot for Sales

- › Generate emails (follow-ups, introductions, proposals)
- › Summarize opportunities, leads, accounts
- › Draft meeting prep and summaries from Outlook + CRM data
- › Suggest next best actions and talking points
- › Real-time call insights during Teams calls

### Copilot for Customer Service

- › Generate response drafts for agents
- › Summarize cases & conversation history
- › Recommend knowledge articles and steps to resolution
- › Auto-classification and routing of cases
- › Real-time suggested responses in omnichannel chat

## AI Insights in Sales

### Sales Insights (standard + premium)

- › **Predictive lead scoring** AI ranks leads based on conversion likelihood.
- › **Predictive opportunity scoring** Highlights deals likely to close or require action.
- › **Relationship analytics** Conversation sentiment, activity levels, health score.
- › **Assistant (formerly Sales Assistant)** Alerts for inactivity, email opens, upcoming renewals.
- › **Conversation Intelligence** AI-powered analysis of call recordings (topics, sentiment, competitors mentioned).

## AI Features in Customer Service

**Customer Service Insights**

- › Case resolution & topic clustering (AI groups recurring issues automatically)
- › Agent performance insights
- › Case backlog prediction
- › Sentiment analytics
- › Automated routing based on historical patterns

**Omnichannel AI Enhancements**

- › Real-time sentiment tracking in chat
- › Smart suggestions for macros and responses
- › AI-based conversation routing & prioritization

## Copilot + AI for Field Service

**Copilot + AI for Field Service**

- › Work order summarization
- › Predictive scheduling suggestions
- › Technician recommendations
- › AI-powered sensor alerts (IoT)

## Marketing AI (Dynamics 365 Marketing / Customer Insights – Journeys)

### AI-Powered Features

- › Predictive scoring for leads & customers
- › AI-generated email content
- › AI-optimized send times
- › Customer churn prediction
- › Behavioral segment creation with AI
- › Product & content recommendations

## Automation with AI + Power Automate

### Automation with AI + Power Automate

- › Intelligent email extraction
- › Auto-population of fields
- › AI-detected intent triggering workflows
- › Predictive routing and process orchestration

### Outlook Email Tracking

Track emails, attach them to CRM records, and create leads/contacts instantly.

### Teams Collaboration on Deals

Collaborate on opportunities, quotes, and cases with Teams chats linked to CRM.

### Teams-Based Approvals

Approve quotes or requests directly inside Microsoft Teams.

### Mobile App with Offline Support

Access CRM data, create tasks, capture notes, and upload media even offline.

### Meeting & Notes Sync

Automatically sync meeting notes and activities between CRM and Outlook/Teams.

### Call Logging & Engagement

Log sales or service calls through the mobile app with geolocation capture.

**01**

### Expense Capture in CRM

Submit expenses with attachments directly inside CRM.

**02**

### Multi-Level Expense Approval

Approve or reject expenses based on pre-defined organizational workflows.

**03**

### Project/Opportunity Expense Linking

Associate expenses with relevant opportunities, projects, or cases.

**04**

### Reimbursement Workflow

Automate routing of approved expenses to Finance for reimbursement.

**05**

### Expense Visibility Dashboards

Track reimbursed, pending, or rejected claims via dashboards.

### Sales & Revenue Dashboards

Capture funding opportunities, create standardized grant records, and establish initial reporting dashboards.

### Marketing Effectiveness Reporting

Enable staff to log hours, calculate labor costs, and track effort per grant.

### Customer Service dashboards

Manage non-labor expenses, reconcile budgets, and monitor spending with alerts.

### Customer 360 Profile

Generate invoices, attach supporting documents, upload vendor invoices, and ensure compliance.

### Data Quality & Completeness Checks

Maintain audit trails, automate federal reporting, and retain documentation for audits.

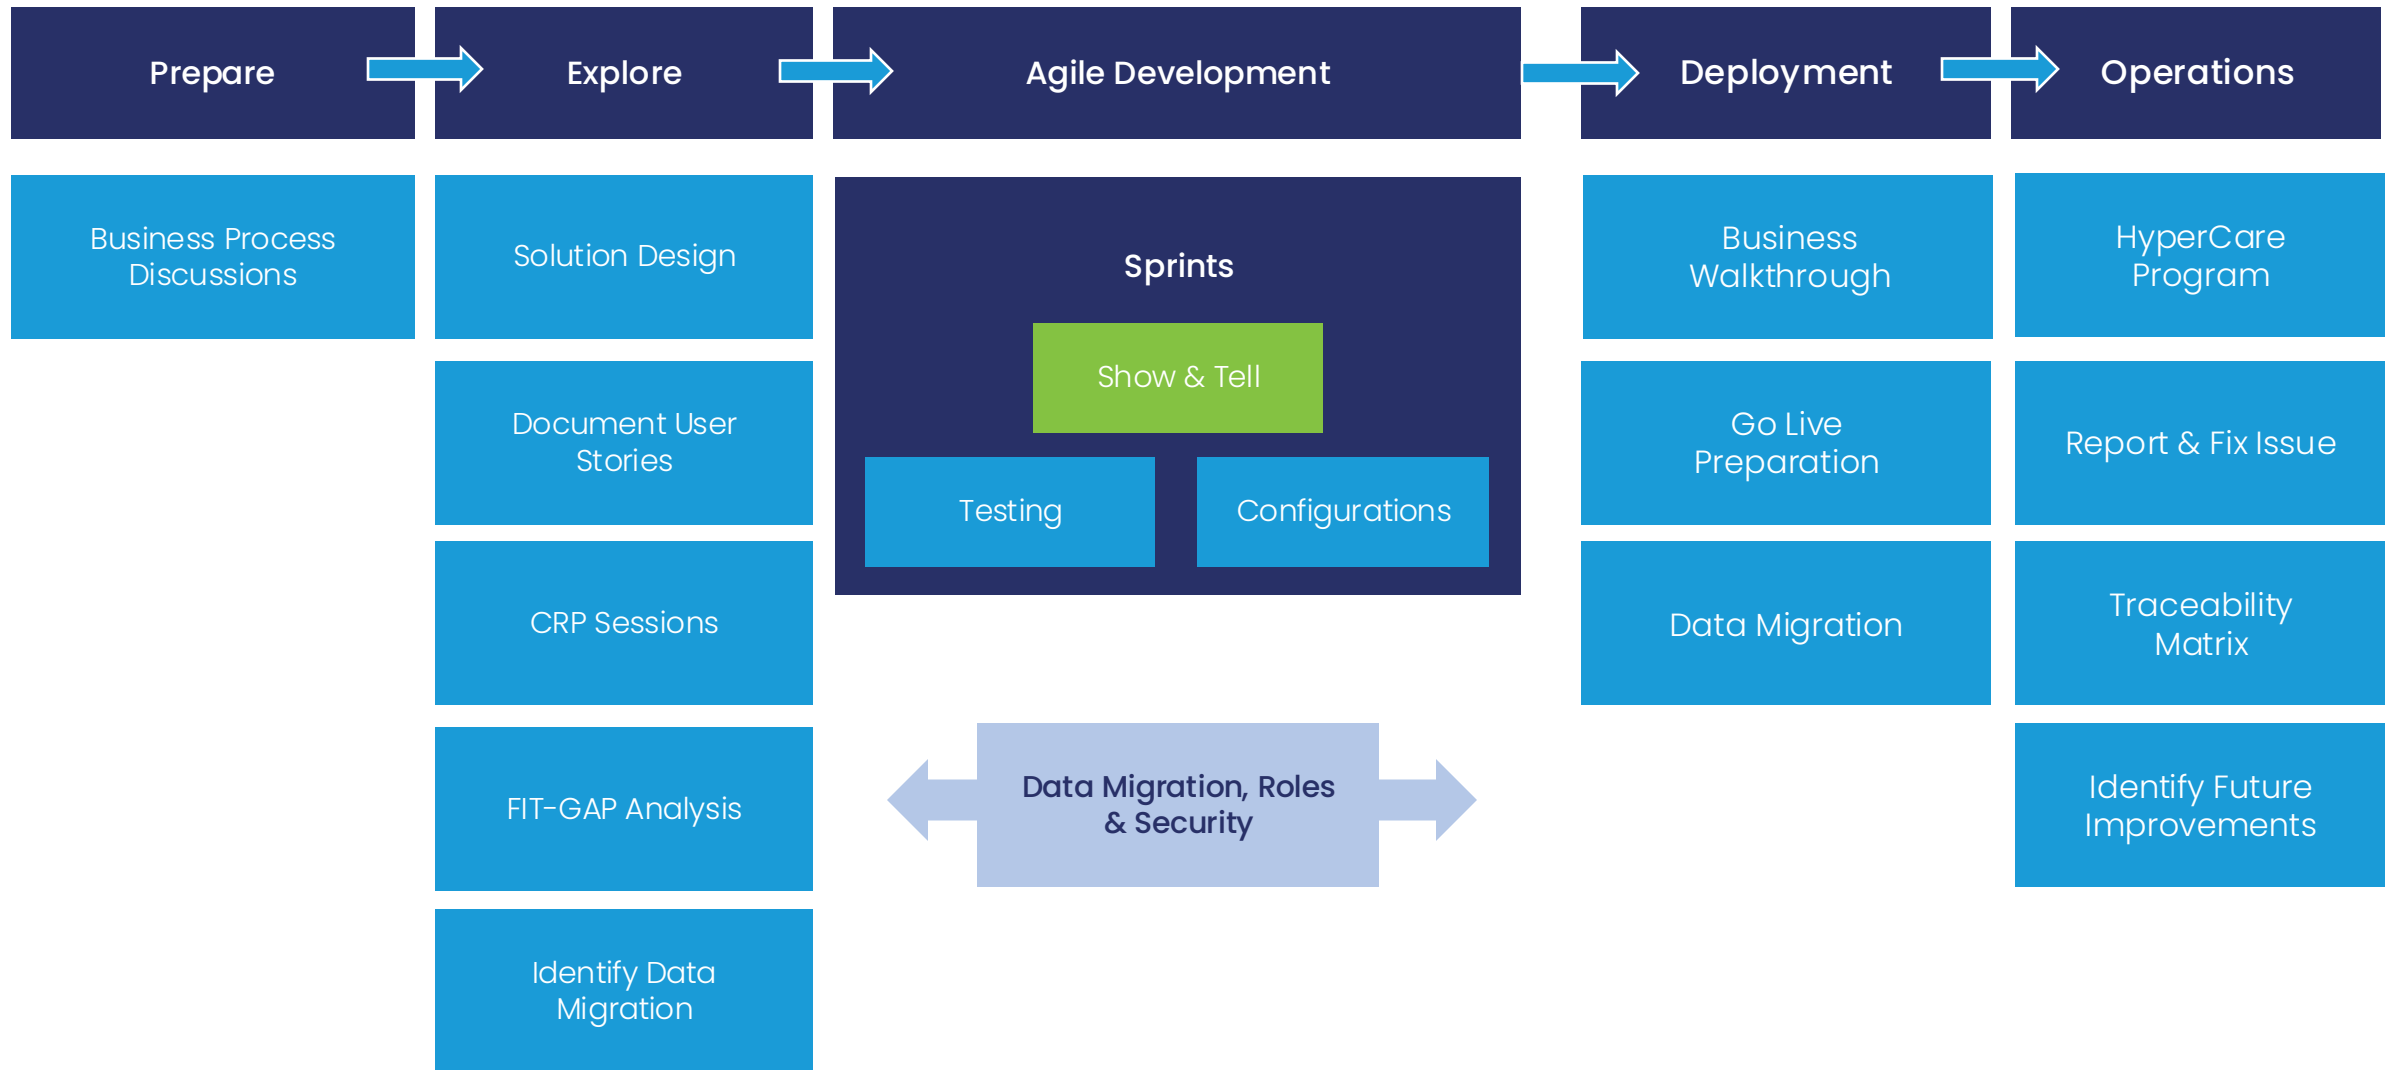

### Adoption & Usage Analytics

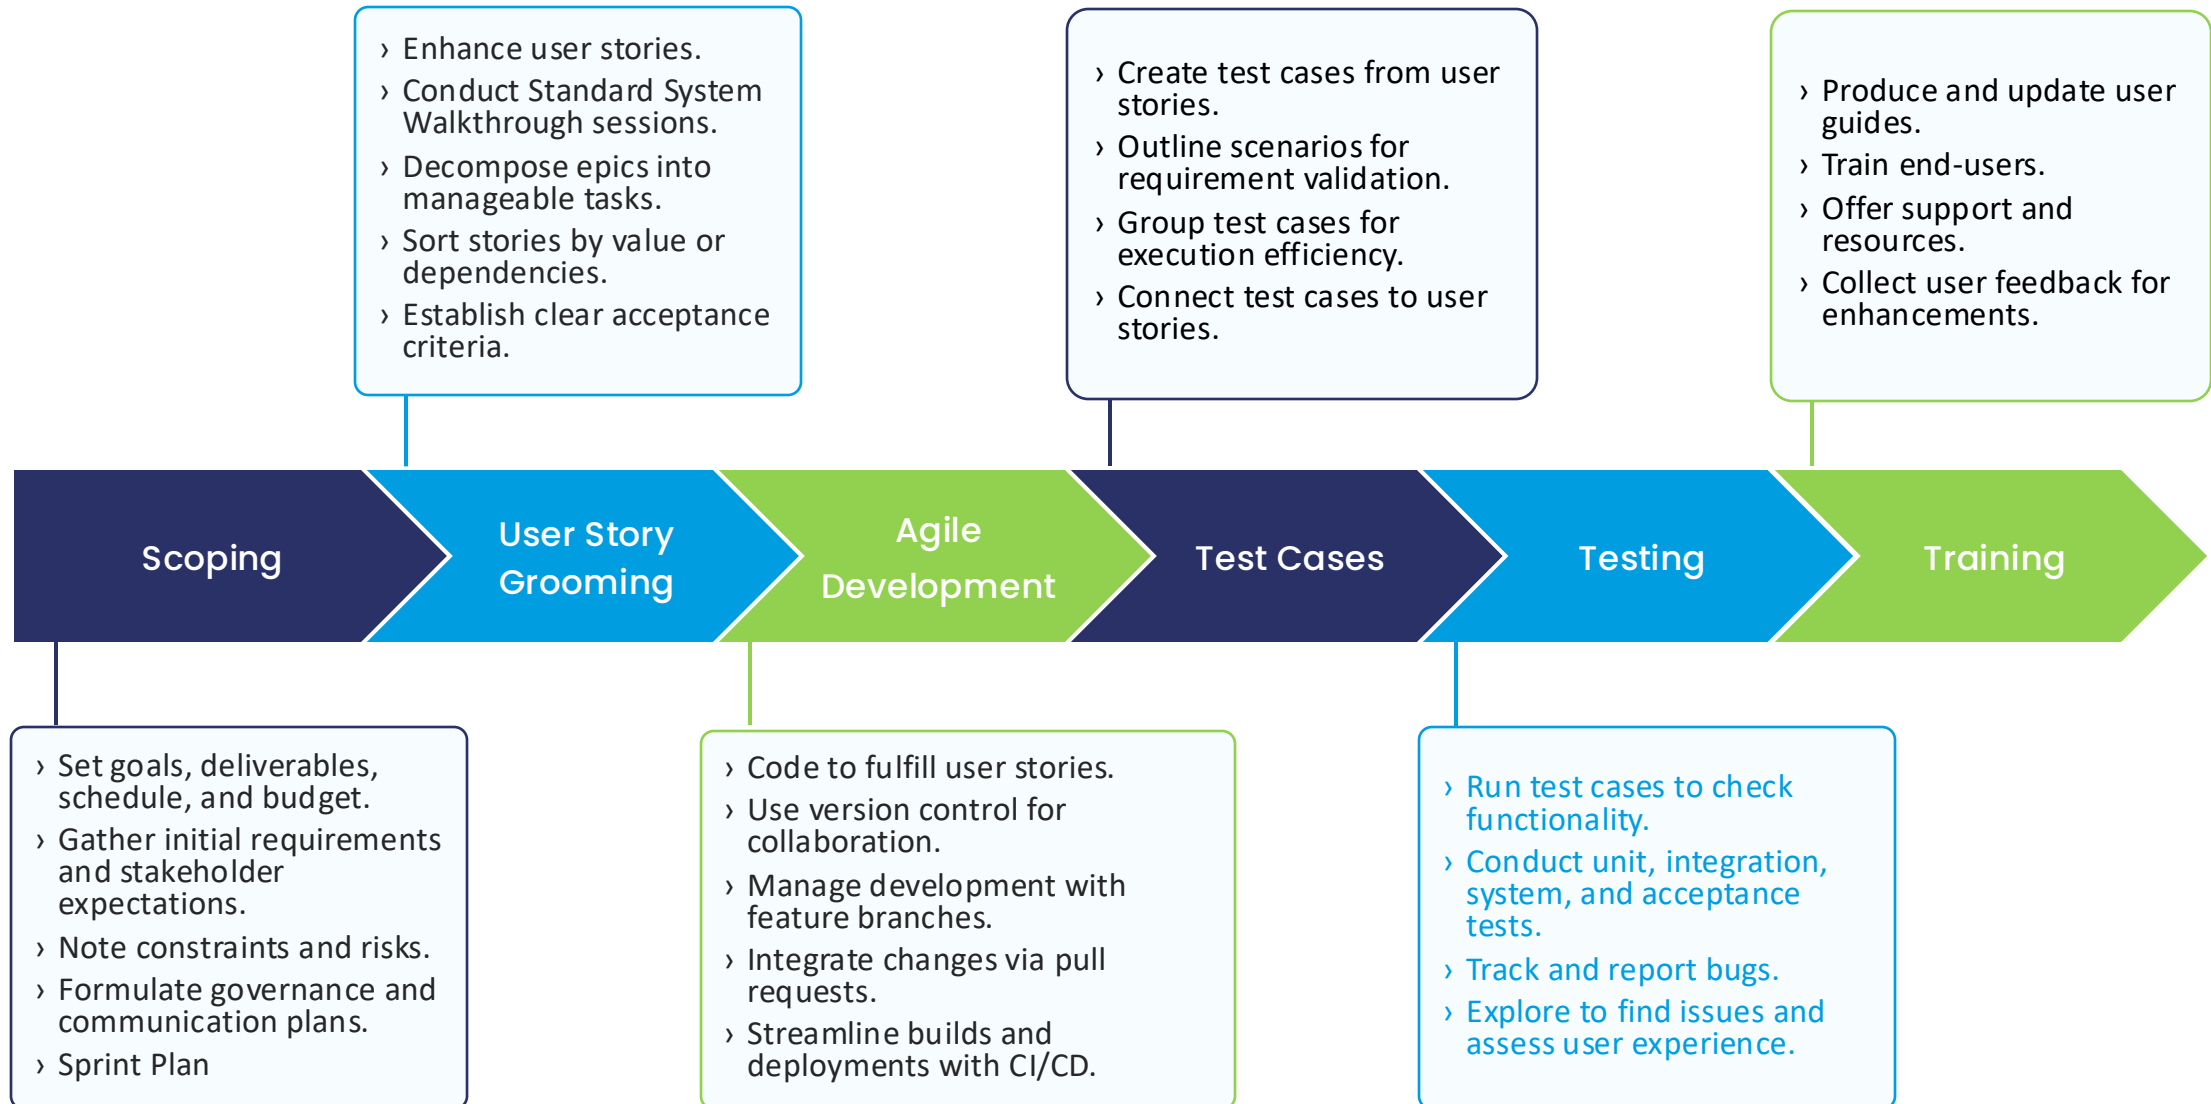

Sync financial data with external systems for accurate reporting and reconciliation.

### Predictive AI & Segmentation Insights

Provide role-based dashboards, forecasting, variance analysis, and actionable insights.

## Our Valued CRM Clients

- 1 Deep expertise across full Dynamics 365 CE stack
- 2 Strong track record in complex integrations
- 3 Specialisation in WhatsApp, CPQ, Portals & Incentive Systems
- 4 Advanced analytics & Customer Insights capability
- 5 Mature delivery method with enterprise documentation
- 6 High performing team: CE, Power Platform, Azure, BI, QA, DevOps
- 7 Scalable and customizable solutions built for long-term growth
