

Dynamics 365 APIs

Connect, Automate, and Scale Your Business Processes!

DynaTech's Dynamics 365 API solutions are designed to streamline your operations by seamlessly integrating **Dynamics 365** with various systems, enabling real-time data flow, automation, and improved decision-making. Our API solutions empower your business to enhance efficiency, collaboration, and customer engagement.

Key Features

Dynamic Integration Suite

Feature: Connect multiple business systems and processes, including CRM, ERP, and third-party applications, into a single, unified workflow.

Benefit: Achieve seamless data flow, eliminate data silos, and enhance business process efficiency across all platforms.

Real-Time Event Notification System

Feature: Get instant updates on critical events, such as order placements, stock changes, and shipment updates, through real-time notifications.

Benefit: Stay responsive to business changes and make proactive decisions by getting timely alerts and insights into key business events.

Smart Search Engine

Feature: Quickly search through vast amounts of business data using intuitive and intelligent search capabilities.

Benefit: Increase productivity by enabling teams to swiftly locate key information, ensuring faster decision-making and streamlined workflows.

Payment Gateway Integration

Feature: Integrate with secure payment platforms like Stripe, PayPal, Razorpay, and more to automate payment transactions.

Benefit: Simplify payment processing, including handling refunds and reconciliation, to enhance operational efficiency and customer satisfaction.

Third-Party Logistics Integration

Feature: Connect with logistics providers like UPS, FedEx, and USPS for streamlined shipping and inventory management.

Benefit: Achieve real-time visibility and control over shipping processes, ensuring timely deliveries and optimized logistics.

Intelligent Data Mapping Toolkit

Feature: Map and transform data between various systems using our Intelligent Data Mapping Toolkit.

Benefit: Eliminate data discrepancies and ensure consistency and accuracy throughout your data management processes.

Financial Systems Integration

Feature: Seamlessly integrate financial data from systems like Dynamics 365 Finance, QuickBooks, and SAP for streamlined accounting operations.

Benefit: Reduce manual entries, minimize errors, and speed up financial reconciliations to boost operational accuracy.

Omni-Channel Management

Feature: Integrate product data, pricing, and promotions across online stores, mobile apps, and in-store systems to maintain a consistent customer experience.

Benefit: Deliver a unified shopping experience across all channels, increasing customer satisfaction and loyalty.

Customer Service Integration

Feature: Automatically create support cases and integrate with D365 Customer Service for quick resolution of payment, order, or delivery issues.

Benefit: Enhance customer satisfaction by offering faster, more efficient support through automated service case generation.

No-Code App Development

Feature: Develop custom applications through a no-code interface integrated with Microsoft Dynamics 365 APIs.

Benefit: Empower your teams to build and deploy apps quickly without requiring technical expertise, speeding up digital transformation.
