

Power Apps Accelerator

Rapid, Low-Code Business App Development with Microsoft Power Platform

DynaTech's Power Apps Accelerator enables organizations to rapidly build, deploy, and integrate enterprise-grade applications without writing a single line of code.

Built on the Microsoft Power Platform, it connects seamlessly with ERP and CRM systems such as Dynamics 365, SAP, NetSuite, and QuickBooks — helping businesses digitalize processes, boost collaboration, and enhance productivity across departments.

> LEAVE MANAGEMENT

Feature: Digitize leave requests and approvals with automated workflows, real-time balance tracking, and calendar synchronization for employees and managers.

Benefit: Simplify leave processing, eliminate manual tracking, and improve transparency across teams.

> VISITOR MANAGEMENT

Feature: Digitally manage visitor registrations, host notifications, Wi-Fi credential access, and audit-ready entry/exit logs.

Benefit: Strengthen facility security and provide a seamless check-in experience for guests.

> TIMESHEET MANAGEMENT

Feature: Allow employees to record daily or weekly work hours with project mapping, configurable approval workflows, and Power BI-driven productivity dashboards.

Benefit: Streamline time tracking, support project costing, and enhance operational visibility.

> INCIDENT & QUALITY MANAGEMENT

Feature: Log, evaluate, and resolve incidents or quality issues using configurable forms, escalation workflows, and live dashboards.

Benefit: Enhance operational control, ensure quick response to issues, and maintain compliance standards.

> EXPENSE MANAGEMENT

Feature: Simplify expense submissions with OCR-based receipt extraction, automated routing, and Power Automate approval tracking.

Benefit: Reduce manual entry, accelerate reimbursements, and ensure compliance with corporate policies.

> TRAVEL DESK MANAGEMENT

Feature: Manage travel requests, itineraries, DA claims, and reimbursements within a single, integrated Power App.

Benefit: Simplify travel coordination, centralize expense handling, and streamline multi-level approvals.

> PURCHASE ORDER (PO) MANAGEMENT

Feature: Automate the creation, review, and approval of purchase orders with PDF generation and real-time status updates.

Benefit: Improve procurement accuracy, transparency, and efficiency from request to approval.

> ASSET & INVENTORY MANAGEMENT

Feature: Track assets, manage stock movement, and perform barcode verification with DualWrite integration to Dynamics 365 F&O.

Benefit: Maintain real-time asset visibility, prevent discrepancies, and synchronize operational data across systems.
