

# Security Tool for CE

**Enhance Security and Governance with DynaTech's Comprehensive Solution!**

DynaTech's Security Tool for CE leverages **Microsoft Dynamics 365 CE** and the **Power Platform**, offering robust tools to enhance security and governance, empowering organizations to innovate efficiently while ensuring compliance and control.

## Key Features

### CoE Admin Command Center

**Feature:** Centralized admin center for managing security and core components of the Power Platform.

**Benefit:** Streamline security oversight and administration, ensuring consistent governance across all applications.

### DLP Impact Analysis

**Feature:** Assess Data Loss Prevention (DLP) policy risks on applications through a comprehensive Power Platform admin view.

**Benefit:** Identify potential compliance issues early, enabling proactive management of data security risks.

### Power Platform Admin View

**Feature:** Dashboard for tracking app ownership and user activity, ensuring adherence to compliance standards.

**Benefit:** Gain real-time visibility into app usage, enhancing accountability and informed decision-making.

### Business Value Toolkit

**Feature:** Align app development with business objectives by quantifying impact using a value calculator and visual value cards.

**Benefit:** Communicate the benefits of applications to stakeholders clearly, driving alignment and investment in app development.

### Developer Compliance Center

**Feature:** Ensure governance and security compliance for developers working within the Power Platform.

**Benefit:** Foster a culture of compliance, reducing risks associated with application development and deployment.

### Business Process Flows (BPFs)

**Feature:** Enforce governance and compliance for Power Apps, flows, custom connectors, and chatbots before deployment.

**Benefit:** Guarantee that all components adhere to organizational policies, enhancing operational integrity.

### Cleanup Old Objects App

**Feature:** Remove outdated objects to maintain security and governance standards within the platform.

**Benefit:** Optimize performance and reduce potential vulnerabilities by eliminating unnecessary legacy components.

### Cleanup for Orphaned Resources

**Feature:** Reassign orphaned resources to prevent mismanagement and enhance governance.

**Benefit:** Ensure efficient resource management, minimizing risks associated with unassigned or misallocated resources.

### Video Hub Components

**Feature:** Effectively manage video content with nurturing components tailored for the platform.

**Benefit:** Enhance user engagement and information retention through well-managed multimedia resources.

### Innovation Backlog

**Feature:** Manage, submit, and prioritize new innovations within the platform for continuous improvement.

**Benefit:** Foster a culture of innovation by enabling teams to track and prioritize development efforts effectively.

### ALM Accelerator for Power Platform

**Feature:** Streamline solution deployment for new makers with advanced tools for managing complex deployments.

**Benefit:** Accelerate the development lifecycle, ensuring efficient and effective app deployment.

### CoE Power BI Dashboard

**Feature:** Gain insights into app and flow usage across environments through a comprehensive Power BI dashboard.

**Benefit:** Drive informed governance decisions based on real usage data, ensuring strategic alignment with business objectives.
