

Shipping Carrier Connector for D365 F&SCM

Seamless Shipping Automation & Multi-Carrier Integration for Microsoft Dynamics 365

DynaTech's Shipping Carrier Connector empowers organizations to automate and simplify their shipping operations directly within Dynamics 365 Finance & Supply Chain Management. By integrating leading carriers like UPS, FedEx, and USPS, it eliminates manual coordination, provides real-time visibility, and ensures accurate, efficient, and cost-optimized logistics — all from a single platform.

> CENTRALIZED SETUP & MULTI-CARRIER INTEGRATION

Feature: Configure carrier endpoints for UPS, FedEx, and USPS within a unified Dynamics 365 setup module. Manage multiple carrier accounts and enable address validation directly from your ERP. .

Benefit: Simplify carrier management, ensure address accuracy, and standardize operations across all shipping modes.

> SMART SHIPMENT CONFIGURATION & RATE COMPARISON

Feature: Configure shipment details, weights, addresses, insurance, and printer settings in one screen. Instantly compare real-time carrier rates across service types and delivery days.

Benefit: Empower users to select the most cost-effective and reliable carrier option with full pricing visibility.

> UNIFIED SHIPMENT MANAGEMENT CONTROLS

Feature: Access core shipping actions — Book Shipment, Shipment History, and Upload Documents — directly on the order screen.

Benefit: Give logistics teams complete shipment control without leaving Dynamics 365, improving speed and transparency.

> AUTOMATIC RATE POSTING & CHARGE ESTIMATION

Feature: Automatically post estimated shipping charges and booking IDs back to Sales Orders for traceability.

Benefit: Eliminate manual data entry while ensuring precise, real-time cost estimation in every transaction.

> ONE-CLICK CHARGE CONFIRMATION & PICKUP SCHEDULING

Feature: Confirm charges and schedule pickups directly from Dynamics 365 with automatic label generation and tracking updates.

Benefit: Streamline dispatch operations and enhance shipment accuracy with end-to-end automation.

> **INTEGRATION & EXTENSIBILITY**

Feature: Extend migrations with Microsoft Dataverse and leverage Microsoft Fabric pipelines.

Benefit: Achieve enterprise-wide interoperability and scalability across your data ecosystem.

> **REAL-TIME TRACKING & SHIPMENT HISTORY**

Feature: Track shipment status through a centralized dashboard with live API integration showing Ready for Pickup, In Transit, or Delivered statuses.

Benefit: Achieve complete shipment visibility and control, reducing delays and improving customer satisfaction.

> **DOCUMENT UPLOAD & DIGITAL CLEARANCE**

Feature: Upload commercial invoices, certificates of origin, and packing lists directly in D365 – auto-synced with carrier portals. .

Benefit: Enable faster customs clearance and paperless processing, ensuring smooth global deliveries.

> **LABEL GENERATION & COMPLIANCE**

Feature: Generate fully compliant shipping labels with package details, carrier service type, and contact information – auto-attached within D365.

Benefit: Maintain audit-ready records and ensure compliance with carrier and regulatory standards
