Microsoft Cloud for Healthcare Patient Insights

Smarter Insights for Precision Care

Microsoft Cloud for Healthcare unifies patient information through Azure Health Data Services, enabling secure access across care teams. With AI, text analytics, and Power BI dashboards, providers gain a 360-degree view of patient health to uncover trends, make informed decisions, and deliver personalized care.

AI-Powered Triage with Health Bot

Capture symptoms, verify identity, and escalate cases for faster patient response.

Smart Assist for Next-Step Recommendations

Automate routine tasks like prescription refills and appointment setup to free up staff.

Unified Patient Records with Azure Health Data Services

Consolidate labs, imaging, and care history into a single comprehensive patient view.

Clinical & Population-Level Insights

Extract structured data from notes and visualize patient trends to optimize outcomes at scale.

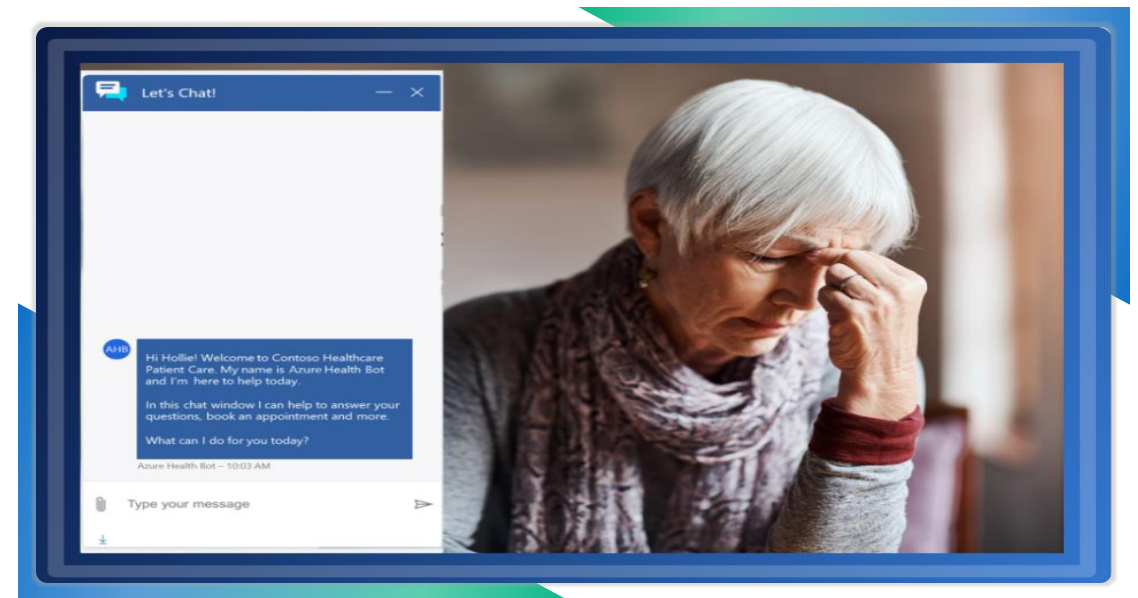

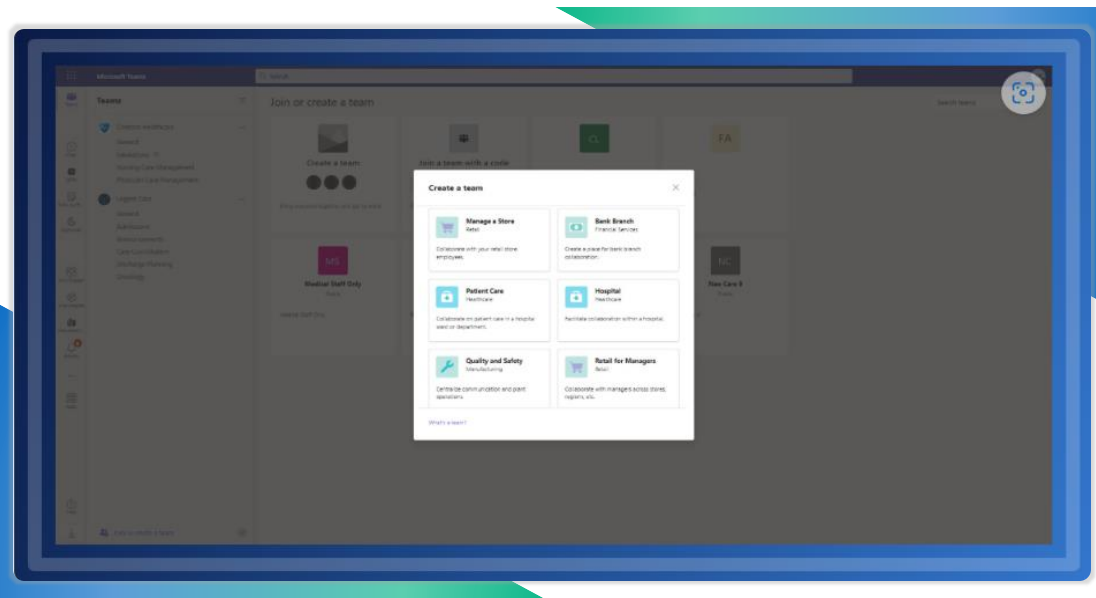

Real-Time Dashboards for Care Advocates

Monitor SLAs, response times, and patient data through live Power BI dashboards.

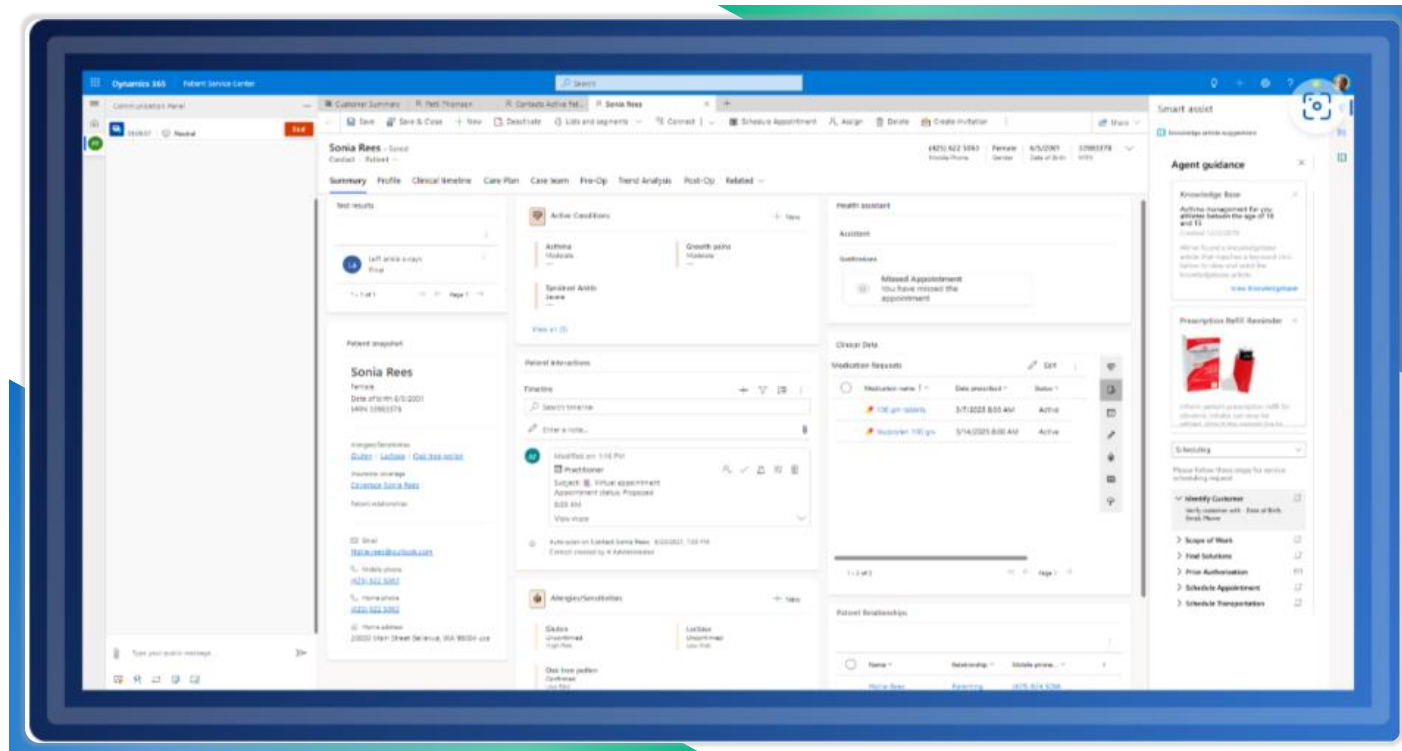

Smarter First-Line Patient Interaction

- ◆ Secure login via mobile portal with instant bot greeting
- ◆ Health Bot verifies identity and collects triage data
- ◆ Escalates urgent cases to care advocates automatically

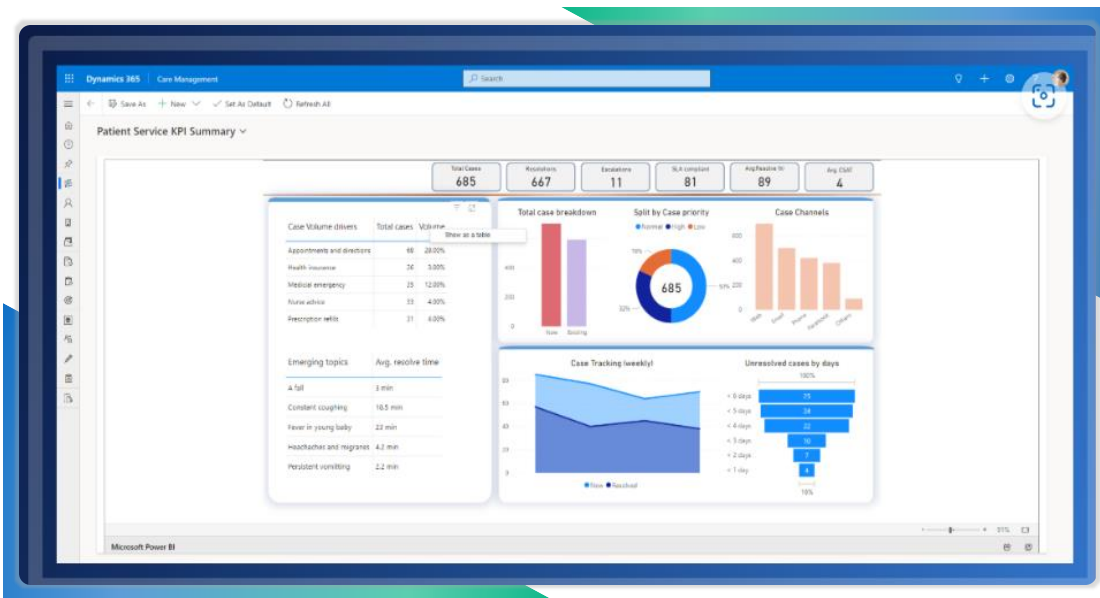

360-Degree Patient View

- ◆ Integrates data from 30+ clinical and operational systems
- ◆ HIPAA-compliant access with labs, imaging, and history in one place
- ◆ Ensures accurate, real-time information for decision making

Operational Visibility for Patient Care

- ◆ Live Power BI dashboards track SLAs, volumes, and response times
- ◆ Microsoft Teams integration centralizes diagnosis and team assignments
- ◆ Patient insights shared securely across departments

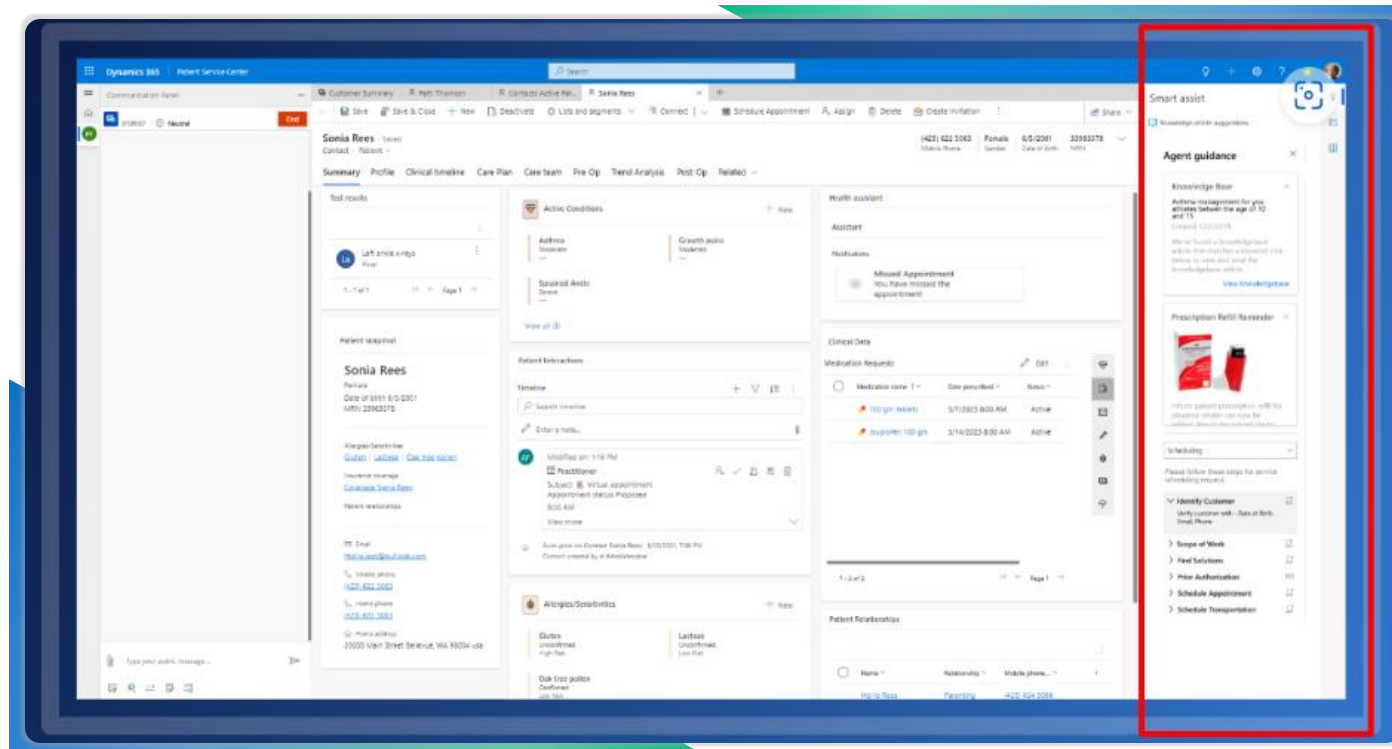

Microsoft Teams - General
